

Quick Activity 2

1. Identify the inputs, processes, and outputs.

Input	Processes	Output
Number of rice meals	Calculate meal subtotal	Meal subtotal
Number of drinks	Calculate drink subtotal	Drink subtotal
Payment amount	Calculate 10% discount on meal subtotal	Discount
	Calculate packaging fee	Packaging fee
	Calculate final bill and change	Final bill
		Change

2. Divide the problem into smaller tasks and arrange them in order.

- Input the number of rice meals, drinks, and payment amount.
- Calculate the rice-meal subtotal by multiplying the number of rice meals by ₱85.
- Calculate the drink subtotal by multiplying the number of drinks by ₱25.
- Calculate the 10% discount from the rice-meal subtotal only.
- Calculate the packaging fee by multiplying the number of rice meals by ₱5.
- Calculate the final bill by subtracting the discount from the meal subtotal, then adding the drink subtotal and packaging fee.
- Calculate the change by subtracting the final bill from the payment.
- Display the meal subtotal, drink subtotal, discount, packaging fee, final bill, and change.

3. Write pseudocode or draw a flowchart.

START

```
READ riceMeals, drinks, payments
mealSubtotal ← quantity × ₱85
drinkSubtotal ← quantity × ₱25
Discount ← mealSubtotal × 0.10
discountedSubtotal ← mealSubtotal – discount
packagingFee ← quantity × ₱5
finalBill ← discountedSubtotal + drinkSubtotal + packagingFee
Change ← payment – finalBill
Display finalBill, change
```

END

4. Perform a dry run using both test cases below. Show each calculation and the resulting values.

Step	Variable	Calculation	Result
1	mealSubtotal	$3 \times \text{P}85$	P255
2	drinkSubtotal	$4 \times \text{P}25$	P100
3	discount	$\text{P}255 \times 0.10$	P25.5
4	discountedSubtotal	$\text{P}255 - \text{P}25.5$	P229.5
5	packagingFee	$3 \times \text{P}5$	P15
6	finalBill	$\text{P}229.5 + \text{P}100 + \text{P}15$	P344.5
7	change	$\text{P}500 - \text{P}344.5$	P155.5

Final bill: **P344.5**

Change: **P155.5**

Step	Variable	Calculation	Result
1	mealSubtotal	$5 \times \text{P}85$	P425
2	drinkSubtotal	$3 \times \text{P}25$	P75
3	discount	$\text{P}425 \times 0.10$	P42.5
4	discountedSubtotal	$\text{P}425 - \text{P}42.5$	P382.5
5	packagingFee	$5 \times \text{P}5$	P25
6	finalBill	$\text{P}382.5 + \text{P}75 + \text{P}25$	P482.5
7	change	$\text{P}600 - \text{P}482.5$	P117.5

Final bill: **P482.50**

Change: **P117.50**
